Giovanni Luis Gyorody

Daytona Beach, FL | (704) 941-5233 | giovanni@gyorody.com | linkedin.com/in/giovanni-luis-gyorody | gyorody.com | U.S. Citizen

Ships software and hardware; seeking a 2027 internship or co-op in technical program management or systems engineering

EDUCATION

Embry-Riddle Aeronautical University **Daytona Beach, FL**
Bachelor of Science in Systems Engineering, Enterprise Concentration **Expected December 2028**
Relevant Coursework: Foundations of AI for Engineering, Digital Circuit Design and Lab, Introduction to Systems Engineering, Systems Engineering Design Considerations, Probability and Statistics, Calculus III, Statics, Physics II, Graphical Communications

SKILLS

Systems Engineering: Stakeholder analysis, CONOPS, requirements, system architecture, trade studies, MBSE (SysML, Cameo)
Test and Evaluation: Verification planning, verification and validation, integration and testing, risk management, MOEs and MOPs
AI-Assisted Software: TypeScript, JavaScript, Python, React Native, Expo, Three.js, React Three Fiber, SQL, Supabase, Git, Linux
Engineering Tools: IBM DOORS, CATIA, MATLAB, KiCad, Fusion 360, Ansys, Excel; CFD, structural analysis, PCB design, CNC milling

PROJECTS

Expedition, Squad-Based Habit Platform (iOS) **February 2026 - Present**
- Built Expedition, an iOS habit tracker for squads: each member's daily progress grows their own unique trail through one shared 3D forest, so the whole group sees who kept their streak. Shipped it independently to a 33-user TestFlight beta.
- Delivered the Three.js and React Three Fiber rendering layer, holding 60 fps on device with an 8-member squad by instancing 400+ trees, rocks, bushes and other environment objects into 3 draw calls.
- Ran the build as a spec-first, AI-assisted workflow; structured audits and on-device verification tracked 85 defects and resolved 64, including 6 security fixes such as an Edge Function trusting a client-supplied user ID.

Launch Vehicle Design Project, Team Lead **September 2024 - November 2024**
- Led a team of 4 through the conceptual design of a 3-stage, 134 ft launch vehicle delivering a 5,000 lb payload to LEO, authoring the team charter that defined roles and accountability standards and directing weekly milestones to a 20+ page technical report.
- Sized interstage adapters, fairings, bulkheads and tanks in MATLAB, converging on a $23.87M vehicle cost by iterative optimization.
- Presented propulsion selection and cost-benefit trade-offs in a formal design review to peers and faculty.

Project Initium (Valveless Pulse Jet), Experimental Jet Engine Propulsion Club **September 2024 - Present**
- Owned research and CAD for an 8-person club team, running trade studies across pulse jet configurations that selected a valveless U-shaped design and set the operating point from chamber volume, fuel flow and resonance frequency.
- Modeled the 4-part engine body and its manufacturing drawings in CATIA and ran preliminary Ansys CFD on the design geometry; the body was CNC milled to Embry-Riddle safety requirements, with hot-fire testing pending the team's test stand.

Glider Design, Analysis and Optimization Competition, 1st Place **November 2024 - December 2024**
- Derived wing geometry, tail configuration, ballast placement and center of gravity from first principles in Excel, then implemented a spin-release launch method used by no competing team, increasing flight distance 178% over a standard throw and taking 1st place.

Motif 65, Mechanical Keyboard Design and Production **May 2024 - August 2024**
- Independently designed a custom keyboard PCB in KiCad and modeled an original top-mount case in Fusion 360, using FEA to eliminate switch-plate hot spots across 3 prototype builds with an external manufacturer.

EXPERIENCE

Corporate Relations Chairman, Society of Hispanic Professional Engineers **August 2024 - Present**
- Built and lead the chapter's corporate relations team, a Director of Outreach and a Director of Events with a subcommittee each, responsible for every company relationship and all professional programming.
- Doubled the chapter's corporate contacts in one semester by turning a predecessor's emails into a structured outreach tracking system.
- Organized mixers, resume workshops, mock interviews and info sessions with company representatives, plus a campus-wide carne asada cookout serving 100+ attendees that funded member travel to the SHPE National Convention.

Founder and Owner, Egg Hatch LLC **February 2026 - Present**
- Formed the LLC that holds Expedition and run every cross-functional, non-engineering piece of the business, from the EIN and operating agreement to business banking, bookkeeping and annual compliance filings.
- Own release management through the Apple Developer Program and App Store Connect: certificates and provisioning, App Review submissions, App Privacy disclosures, legal and consent flows, and TestFlight beta distribution.

Elementary School Tutor, America Reads America Counts **November 2024 - Present**
- Tutor elementary students in reading and math each academic year under the federal work-study program.
- Coordinate with classroom teachers on goals and schedules, adjusting plans as each student's needs change.
